

Parts List

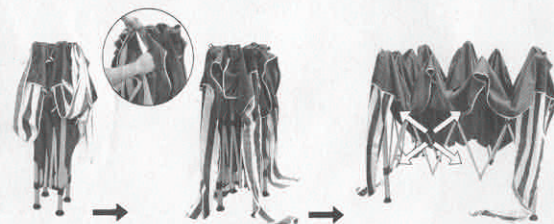

CAUTION

- This pop up gazebo is quick and easy to put up or take down. Do not use in windy or very wet conditions, take it down and store it safely.
- When putting up or taking down the gazebo do not force the folding mechanism. Work around the gazebo, helping the legs to move inwards or outwards progressively.
- Do not leave the gazebo up for extended periods, it is designed to be quick and easy to put up or take down.
- Extended exposure to direct sun or rain may cause the fabric to fade or deteriorate.

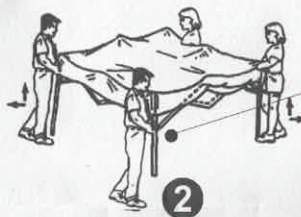

SPECIAL NOTICE

- The special folding mechanism of this pop up gazebo causes all of the legs to move inwards or outwards, when you try to move one. Hence you need at least two people helping the legs to move inwards or outwards progressively to put it up or take it down.
- Always secure the gazebo by pegging the base of each leg and pegging out all four guy ropes from the corners of the canopy.

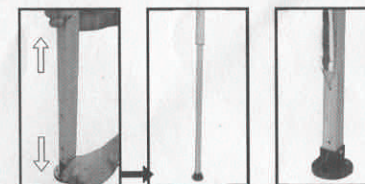

Step 1

- Place the gazebo in the middle of the area where it is to be used. Remove the bag and stand the gazebo on its feet.
- Start gently working the legs outwards; work around the gazebo, helping each of the legs to move outwards progressively.
- Be careful not to pinch your fingers in the folding mechanism.
- Do not apply excessive force as this could cause the folding mechanism or the legs to bend.

Step 2

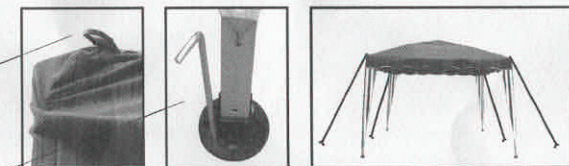

- Locate the plastic sliding joint (A) near the top of each leg. Slide these joints upwards until they each lock into place with the spring-loaded pins. You will hear a loud 'click' as each of these joints are locked into position.

Step 3

- Slide the inner leg pole downwards to extend the legs. Each leg locks into place with a spring-loaded pin. You will hear a loud 'click' as each leg locks into position.
- There is a second pin location hole on each leg; this allows you to increase the headroom in the gazebo, if required.
- Clip the fabric sides to the holes at the base of each leg.

Always secure the gazebo by pegging the base of each leg and pegging out all four guy ropes from the corners of the canopy.

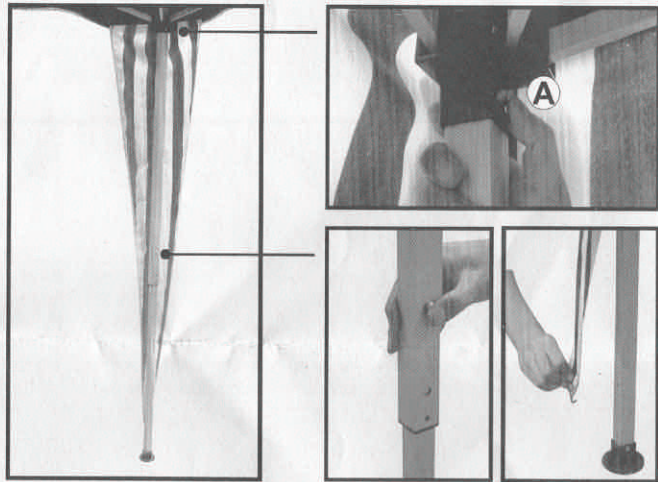

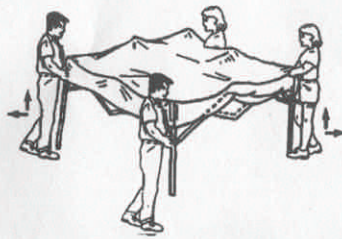

Step 4

- Tie the guy ropes to the plastic rings at the corners of the canopy.
- Peg out all four guy ropes.
- Peg down the feet of each leg.

halfords

CLOSE GENTLY  
(This should be carried out by at least two people)

**Step1**

- Remove the pegs from the guy ropes and the four feet.
- Un clip the fabric sides from the holes at the base of each leg.
- Shorten the legs by pressing in the spring-loaded pins and sliding the inner leg sections up into the outer leg sections.

**Step2**

- Locate the plastic sliding joint (A) near the top of each leg. Release these joints by gently pressing upwards and pressing in the spring-loaded pins. Slide the joints down below the spring-loaded pins.

**Step3**

- Slightly lift the legs from the ground and start gently working the legs inwards; work around the gazebo, helping each of the legs to move inwards progressively.

**Step 4**

- Do not put away for storage unless the canopy is completely dry.
- To store replace the pop up gazebo in the carry bag.

Part 1 List

CAUTION  
The pop up gazebo is quick and easy to put up or take down. Do not use in windy or  
very wet conditions. Take it down and store safely.  
When putting up or taking down the gazebo do not force the fabric mechanism.  
Work around the gazebo, helping the legs to move inwards or outwards progressively.  
Do not leave the gazebo up for extended periods. It is designed to be used and easy  
to put up or take down.  
Extended exposure to direct sun or rain may reduce the life of the fabric or hardware.

SPECIAL NOTICE  
The special fitting mechanism of the pop up gazebo causes all of the legs to move  
inwards or outwards when you try to move one. Hence you need at least two people  
helping the legs to move inwards or outwards progressively to put it up or take it down.  
Always secure the gazebo by pegging the feet of each leg and pegging out all four  
guy ropes from the corners of the canopy.
